## **Safe Cracker Math Game Instructions:**

**To play the game, you need 2 or more players. One person secretly chooses a 4-digit number and writes it down on a piece of paper. The other player guesses the number by writing it in the grid. The person who chose the number tells them whether the number is right or wrong by marking each digit with either a star, a check or an X. If the number is correct and in the correct digit, they get a star. If it is correct but in the wrong digit, they get a check. If it is wrong completely, they get an X.**
